Exhibit B Cogent Pricing

The pricing in Exhibit B represents port pricing for all Cogent Layer 3 Dedicated Internet Access Ethernet products. Pricing in Exhibit B is available to any Quilt member as they complete existing contract terms. After completion of an initial term, Quilt members can elect month-to-month renewal terms for all On-Net products without a corresponding increase in price. For Off-Net products, Cogent will attempt to provide month-to-month renewal terms upon request, but is restricted to loop provider terms.

Where available, Quilt members can elect to purchase burstable circuits. The burst price per Mb is in the pricing table below in addition to the price for the committed bandwidth. Actual usage for individual burstable circuits is billed at the 90th percentile. Actual usage across multiple circuits is summed billed at the 90th percentile or aggregately billed at the 95th percentile.

On a first-come-first serve basis, Cogent will waive all charges for BGP4 and BGP6 (up to 25 ASNs per member), Layer3 VLANs (up to 25 per member), and IPv6 allocation orders.

Quilt members should contact the account manager or other sales representative for additional product information (e.g., minimum bandwidth commitment, burstability, and available bandwidth increments).

Most 100G and all 400G ports are considered on an Individual Case Basis to determine availability.

All Cogent On-Net buildings are capable of accepting dark fiber handoffs on an Individual Case Basis.

Applicable MRC/NRC fees may include x-connect charges to extend service from Cogent's cabinet within a data center facility to the dark fiber providers equipment. In Corporate locations NRCs vary widely due to riser distances.

Security Services

Cogent does not offer a security service product. Cogent has a dedicated abuse team which ensures there are no egregious misuses of the network, including spamming and DDoS attacks. Cogent provides a Blackhole server and BGP communities for addressing DDoS attacks. Customers advertise affected prefixes to the Blackhole server via a BGP session or community to null route traffic up to a per IP basis.
