

# NSF Campus Cyberinfrastructure PI and Cybersecurity Innovation for Cyberinfrastructure PI Workshop

October 3-4 | Albuquerque, New Mexico

---

**NSF Program (either CC or CICI): CC**

**Program Area: CC-NIE**

**Award Number: 1541396**

**PI: Sam Scozzafava**

**co-PIs:** Duncan Brown, Melissa Green, M. Lisa Manning, Eric Sedore

**Project Title:** CC\*DNI Engineer: Leading the way for research computing at Syracuse University and beyond

## **Project Goals:**

- Raise awareness and use of, and better realize investment in, existing Syracuse University cyberinfrastructure.
- Address and eliminate inefficiencies generated by redundant hardware and software systems in individual research groups and help migrate existing local resources to more sustainable campus-wide infrastructure.
- Create, foster and maintain an internal website detailing information about computational resources and their use on campus.
- Collaborate nationally and internationally through partnering with research projects across campuses, attending and speaking at national conferences and supercomputing centers, and LIGO and OSG collaborating institutions.

**Sam Scozzafava**  
VP for IT and CIO  
Syracuse University
